200/40 SUPER PIVOT ROOF

Refreshed, sleek, rectangular design

Louvretec's family of matching, fully compatible Opening & Retracting Roof systems has been three years in development.

Compatible match with the 220/45 Retract Roof

The 200/40 SUPER PIVOT ROOF is the scaled down Spiral Pivot version of our new 220/45 Super Retract blade.

These blades incorporate all that we have learnt from over 20 years of designing Operable Roof systems.

- Both blades visually compatible
- Sleek pitched rectangular design,
- A wide drainage channel,
- Extended closing angle
- Plus featuring our new "Cushion Closing" interlocking system providing a quiet snug fit.

Powered by Somfy we believe this new design will prove to be a great addition to our Opening Roof range.
