270 TRANSLUCENT ROOF

Let there be light

If loss of light is an issue when the Opening Roof is closed then the unique 270 TRANSLUCENT ROOF provides the answer.

The Translucent Roof has had a completely new design with "Cushion Closing". This roof now features an all new white in-fill panel of Acrylic Naturelite Plexiglas

Plexiglas offers natural UV protection throughout the material - it does not rely on an applied surface coating for UV protection. It is one of the reasons Plexiglas is used in aircraft cabin windows to protect from strong UV light and substantial differences in pressure and extreme cold.

This same material is now used on all 260 Translucent Opening Roofs - high light transmission coupled with naturally UV-stable technology is as good as it gets.

This style of Opening Roof now comes with a 185mm extra wide gutter to all four sides as standard.
